[mission 42] $ gsh goal

()=(
Mission goal
A secret message has been found, it is kept in the drawer in Merlin's office. It was probably enciphered using a Caesar shift cipher.
Decrypt it by making an exhaustive search from the command line.
Hint
All other secret messages that have been found were using a shift between 10 and 16.
Useful commands
tr STRING1 STRING2
Replace each character STRING1[i] by STRING2[i] on the standard input, and output the result.
Remark: "tr" is an abbreviation for "translate".
Example: if
STRING1 = "abcdef"
STRING2 = "klmnop"
the file will be output with the following substitution (other characters are left unchanged)
a -> k b -> l c -> m
d -> n e -> o f -> p
Note: instead of "abcdefg", it is possible to write "a-g".
This command is particularly useful with a redirection "< c".
